

# Q750 STREETFIGHTER

THE ULTIMATE

At Steeda we have some pretty sharp engineers. They love to ponder the finer points of combustion efficiency - the subtle nuances of vehicle dynamics - the calculus of weight distribution. But that's just a fancy way of saying, they're all about holeshots, hot laps and horsepower. The **Steeda Q750 StreetFighter** delivers on our uncompromising promise that Speed Matters®. But we know that power without control means little so our engineers created a balanced package with precision suspension and chassis modifications that we call the Steeda G/Trac Suspension System. It delivers a combination of quickness, top speed, precise handling, and overall performance that is second to none.

We believe that Maximum Performance means more power, more traction, more control, and more refinement. With the **Steeda Q750 StreetFighter** we've developed the finest performance Mustang available today. So, when it's Go Time this is the seat you want, with 825 horsepower burbling beneath the hood waiting to be turned loose. The **Steeda Q750 StreetFighter** is superbly engineered and thoroughly sorted out. We put it through its paces on the track, the street and at the drag strip under the toughest conditions imaginable and the result is a refined, balanced performer second to none.

And it's built to the highest quality standards including our performance parts built under rigorous ISO 9001:2008 Certified Standards. That's why we can stand behind it with a 3 year/36,000 mile limited warranty\*. Whether your idea of a relaxing Saturday is enjoying a spirited drive along a twisty backcountry road, diving into a corner at 10/10ths or feeling the adrenaline rise as the Christmas tree descends, there's a **Steeda Q750 StreetFighter** with your name on it.

\*See your dealer for details.

# Q750 STREETFIGHTER

THE ULTIMATE

*Steeda engineers have developed a sophisticated combination of balance, refinement and unparalleled brute strength. All Q-Series Steeda Mustangs are designed to be comfortably driven daily and when the performance need arises, to be able to easily outperform the competition.*
